PROJECTS

MYPORTFOLIO

Developed a personal portfolio website using HTML, CSS, and JavaScript to showcase my projects and skills.

Integrated responsive design principles to ensure compatibility across various devices and screen sizes.

HIGHWAY TICKET MANAGEMENT SYSTEM

Developed a scalable microservice-based backend system using Spring Boot and Spring Cloud to manage highway tickets, vehicle registration, user profiles, and internal payments. Implemented Eureka for service discovery, a Config Server for centralized configuration, and a Spring Cloud Gateway for intelligent routing, with comprehensive API testing via Postman.

SHOE SHOP MANAGEMENT SYSTEM

Developed an enterprise-level web application using Spring Boot and MySQL to manage sales, inventory, customer loyalty, and employee data for a multi-branch shoe retail company.

Implemented secure authentication with Spring Security and OAuth 2.0, and ensured seamless user experience with custom validations, exception handling, and sorting features.

FITNESS-APP (MOBILE APPLICATION DEVELOPMENT)

Developed a cross-platform mobile application using React Native and TypeScript with Expo, focusing on a seamless user experience, efficient state management, and robust type safety. Implemented features including navigation, API integration, and custom UI components, ensuring high performance and scalability.
